Elan Ness-Cohn, Ph.D.

 nesscoder.com   ness.cohn.elan@gmail.com   (847) 420-0296
 github.com/nesscoder   linkedin.com/nesscohn   Chicago, IL

SUMMARY

- **Complex thinker:** Nimble learner with a diverse repertoire of expertise – *e.g.,* math & science literacy, wet & dry lab experience, and educational & business pragmatism – motivated by solving multifaceted problems
- **Empathetic collaborator:** Intuitive, team-oriented leader – versed in bridging interdisciplinary & interpersonal communication gaps – with track record of driving high impact scientific discovery
- **Relentlessly curious:** Meticulous, strategically-minded analyst – armed with a breadth/depth of data science skills – adept at executing deep diligence & clearly communicating results to wide audiences

EXPERIENCE

Entrepreneurial Fellow – Chicago Biomedical Consortium (CBC) – Chicago, IL 2022–date
▶ *Led assessments to identify most promising early-stage therapeutic technologies:*
- Part of four-Fellow cohort that over a year, assessed 21+ letters of intent (LOI), yielding 5 full scale assessments and 1 award ($250K); led 6+ LOI & 1 full assessment; supported 11+ LOI & 4 full assessments
  - *LOI:* over stringent 3-week process developed case to (de-)prioritize projects; communicated results to academic/pharma/VC review boards (*e.g.,* ML-based drug tox screening of iPSC organoids – *deprioritized*)
  - *Full Scale:* through rigorous 10-week process developed technology positioning for microbial consortia platform in the context of current, financed, microbiome landscape; articulated investment thesis based on positioning, potential indications, financing risk, and go/no-go experiment to 30+ pharma & VC partners
▶ *Managed peers, faculty, and industry partnerships to advance translational research:*
- Managing 2+ CBC funded projects; advising on experimental plans; establishing timelines & budgets; coordinating scientist & contractors to hit milestones (*e.g.,* pre-IND data package of myeloid cancer therapeutic)
- Strategically advising 3+ academic labs on translational of early-stage research; guiding faculty in strategic positioning of assets; informing experimental plan based on key experimental benchmarks/regulatory milestones
▶ *Created business development infrastructure:*
- Built and analyzed Chicago faculty database of 160+ members and 20+ success metrics; identified and contacted promising faculty to fill award pipeline; designed an OpenAI NLP-based automation for future pipeline searches

New Product Planning Extern – Evozyne – Chicago, IL 06/2023–date
▶ *Building commercial case for new drug product pipeline:*
- Bolstering new product planning strategy using data-driven insights; assessed commercial viability, forecasted revenue, positioned drugs, and cultivated stakeholder engagement with tailored KOL discussion guides

Business Development Extern – Rhaeos, Inc – Chicago, IL 01/2023–04/2023
▶ *Shaped growth strategy for global deployment of core technology:*
- Devised prioritization strategy for deployment of Rhaeos's FlowSense technology in low & middle income countries; built statistical models to estimate market size & designed qualitative research materials

Life Science Analyst Extern – Back Bay Life Science Advisors – Boston, MA 11/2022–05/2023
▶ *Developed industry white paper:*
- Distilled landscape analysis of deal flow in women's health space into an industry white paper to support firm marketing and inform consultancy's client recommendations for perspective partnerships/investments

Ph.D. Candidate – Braun Lab, Northwestern University – Evanston, IL 2017–2022
▶ *Spearheaded multi-disciplinary research collaborations:*
- Led 5 collaborative projects leveraging expertise in circadian biology and applied math; resulted in 3 oral podia, 7 posters at US & international conferences, and 3+ first author publications (e.g. *Science* and *Bioinformatics*)
▶ *Designed and taught biology, math, and programming courses:*
- Designed an *Intro to Data Science Lab Course* and taught 5 grad and 2+ undergrad level courses in Cell Biology, Bioinformatics, Biostatistics, and Data Science; resulted in procurement of graduate level teaching certificate

- ► *Managed research team:*
  - ○ Mentored 11+ graduate and 2 undergraduate students in various computational research and data management techniques; led to the development of 1 software package and accompanying manuscript
- ► *Developed software:*
  - ○ Developed a suite of 3 open-source software packages for optimizing the design and analysis of *omic time-series experiments for chronotherapeutic application with over 9K+ downloads and ∼30hours/month usage

EDUCATION

Northwestern University – Ph.D. (Biomedical Research) – *Evanston, IL*   2022

MIT – B.Sc. (Biology), Concentration (Education) – *Cambridge, MA*   2017
  - ○ **Honors:** Senior Thesis - Boit Prize for Engineering Writing
  - ○ **Jaenisch Lab:** *Engineering Human Pluripotent Stem Cells With Insulin Reporter to Model Type 1 Diabetes*
  - ○ **Kim Lab:** *Regulation of Stress Physiology & Longevity by the EIF3 Complex in C. Elegans*

MIT – Data Science and Machine Learning: Making Data-Driven Decisions – *Professional Certificate*   2023

COMPUTATIONAL & TECHNICAL SKILLS

Programming: R ● Python ● Bash ● R Shiny ● LaTeX ● git ● SQL ● HPC (SLURM)
Machine Leaning: Tidymodels ● Keras ● Tensorflow
Data Mining: statistical analysis ● dimensionality reduction ● clustering ● visualization
Modeling: dynamical systems ● topological analysis ● toy model development
Research: algorithm & pipeline development ● inter-disciplinary collaboration ● software development
Laboratory: CRISPR/Cas-9 genome editing ● plasmid design ● molecular cloning ● qPCR
Market Intelligence: primary market research (*e.g.* KOL/Physician interviewing)
                    secondary data analysis (*e.g.* GlobalData, BioCentury, Pitchbook, Biomedtracker, *etc.*)
Languages: English ● Hebrew

SOFTWARE (HIGHLIGHTS)

Fasano-Franceschini Test – R Package

An open-source implementation of the Fasano and Franceschini test – a 2-D Kolmogorov-Smirnov (KS) two-sample test

TimeCycle – R Package

A non-parametric method that leverages results from dynamical systems theory and algebraic topology to test whether a dynamical variable (gene expression) exhibits cycling dynamics – Video Tutorial

TimeTrial – **R Shiny Web Application:** Synthetic, Biological

An interactive software suite that enables circadian researchers to perform head-to-head comparisons of four leading cycle detection methods using both synthetic and biological data – Video Tutorial
